

Hello! Thanks for buying this template!

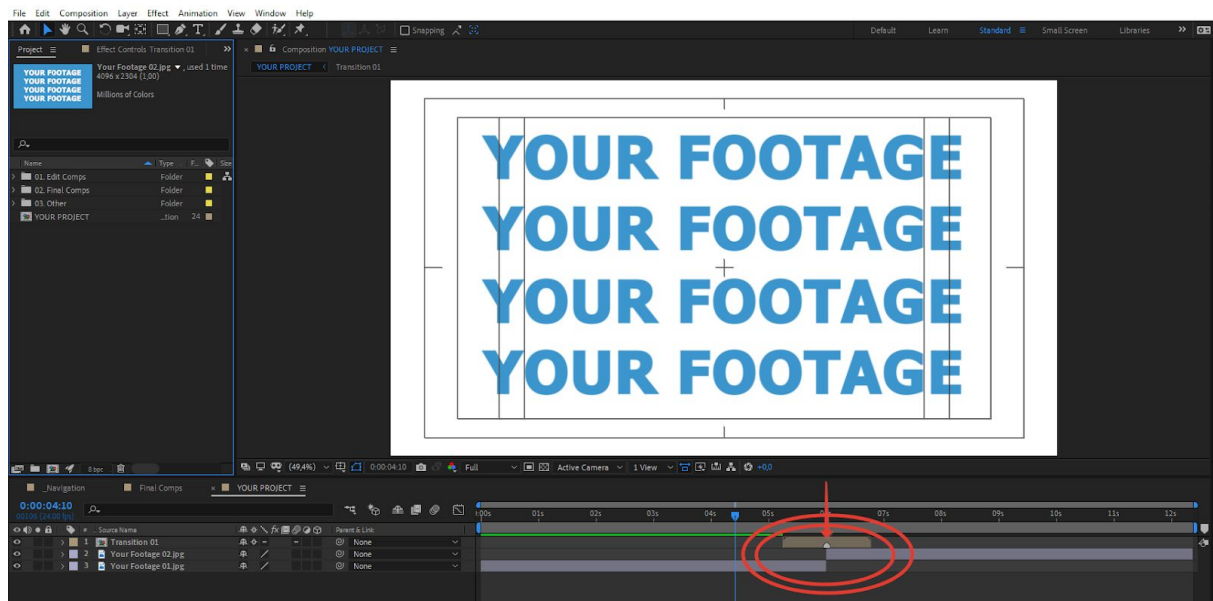

It's really easy to use. Here is the simplest example:

1. Open "Final Comp" composition and copy transition to composition with your work project.
2. Add the footage that will be used. I will show the example of these two:

**YOUR FOOTAGE
YOUR FOOTAGE
YOUR FOOTAGE
YOUR FOOTAGE**

**YOUR FOOTAGE
YOUR FOOTAGE
YOUR FOOTAGE
YOUR FOOTAGE**

3. Place footages on the timeline one after the other, and is transited above the place where the transition animation will take place. Make sure the marker on the transition layer matches the edges of the footage layers.

Thats all.

Hope you like it,

Best regards.
