This project contains 13 different scenes.

This project uses Montserrat font
you can download it from Google Fonts.
<https://fonts.google.com/specimen/Montserrat>

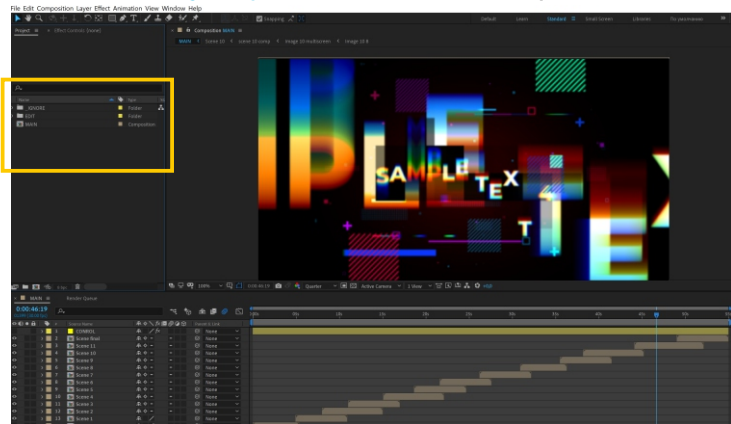

You can change text, videos, some colors and logo
Music and videos in the preview not included to this project

Opener customization

First of all, open [Modern Opener.aep](#) file.

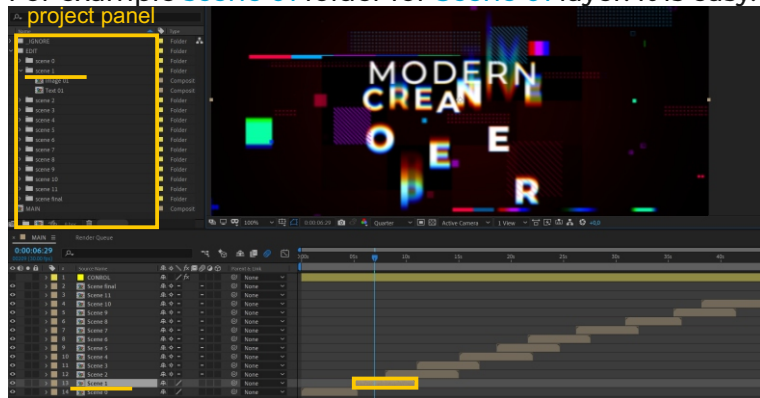

You must have Adobe After Effects CC installed.

In the left [Project panel](#) find [MAIN](#) comp and double click on it.

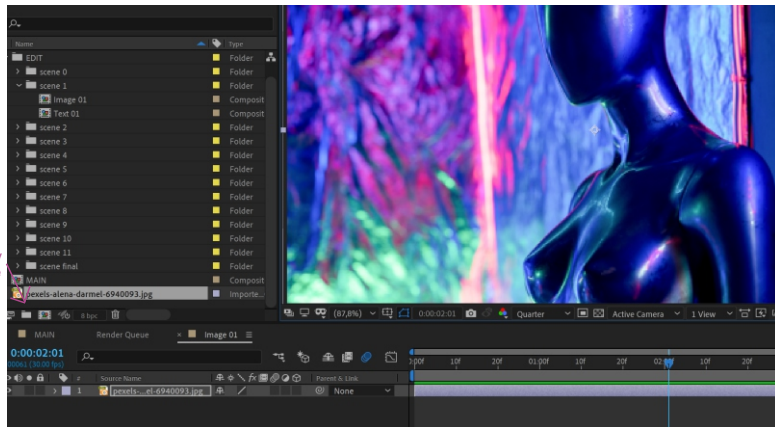

Opener customization

In the opened composition look at the layers in the bottom left corner. To add your images/videos and change the text open **edit** folder in the **Project Panel**. Then find the folder with corresponding number in the name. For example **scene 01** folder for **Scene 01** layer. It is easy.

Opener customization

To add your video or photo open one of the 'image' compositions. For example **image 01**. Import your video/images and just drag and drop it to the opened composition.

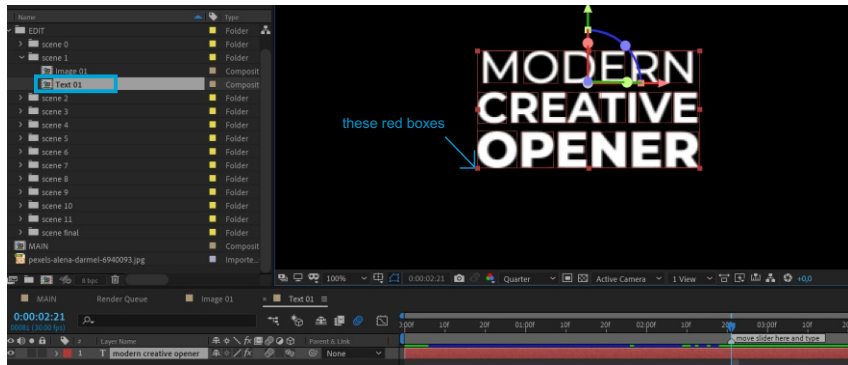

To import media in AfterEffects just double click on the empty space in the Project Panel

Opener customization

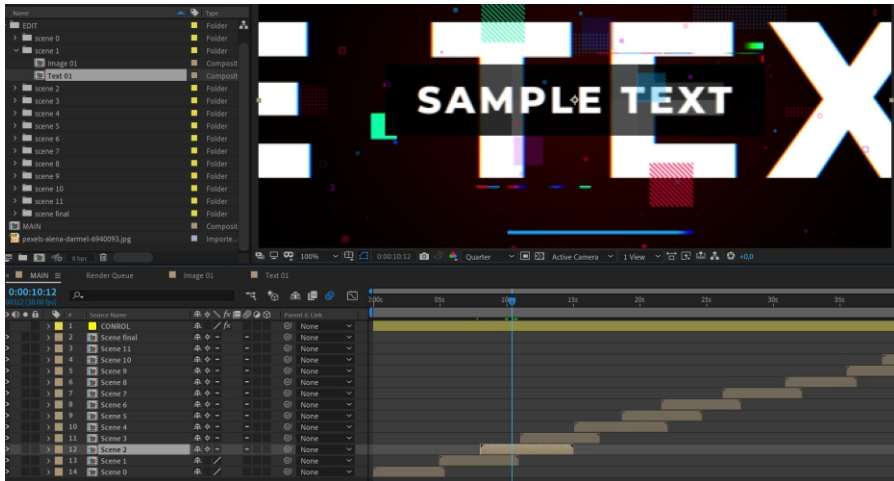

To change the text open one of the 'text' compositions.
For example **text 01**. Just select one of two text layers
and double click on it to type something.

*To change the size of the text use red colored boxes. Holding SHIFT click and drag your mouse.
If you want to add additional text layers select text layer and press CTRL+D*

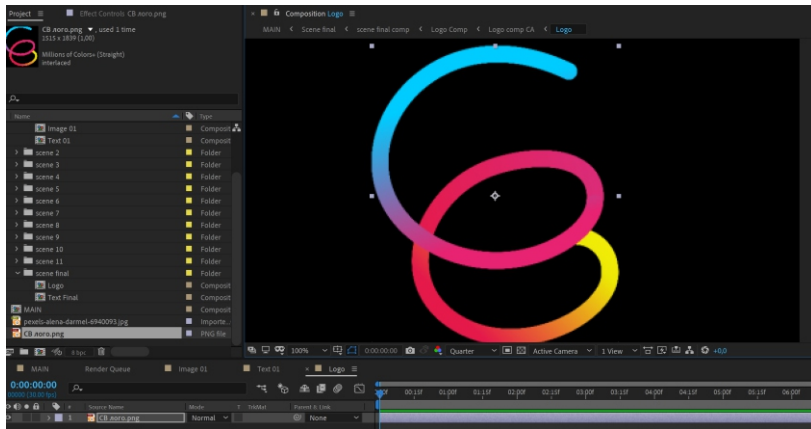

Opener customization

Do the same with another scenes. Import and place the video. Type some text.

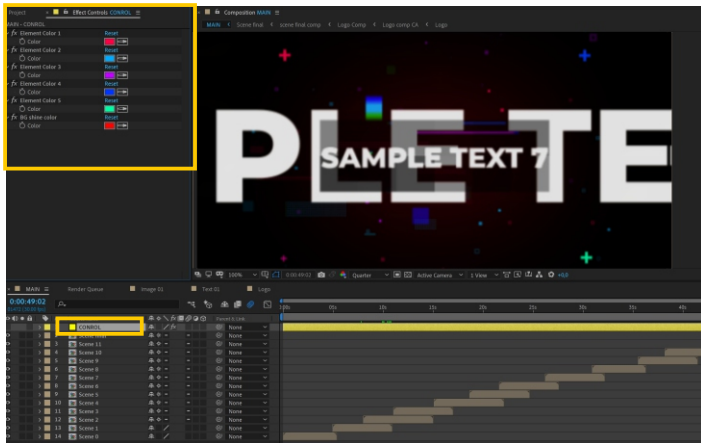

Opener customization

To add your logo go to **Project Panel** and open **Edit/Scene Final/logo** comp.
Import your logo with alpha channel and just drag and drop it
to the opened composition.

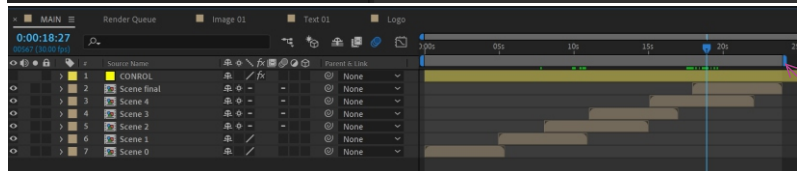

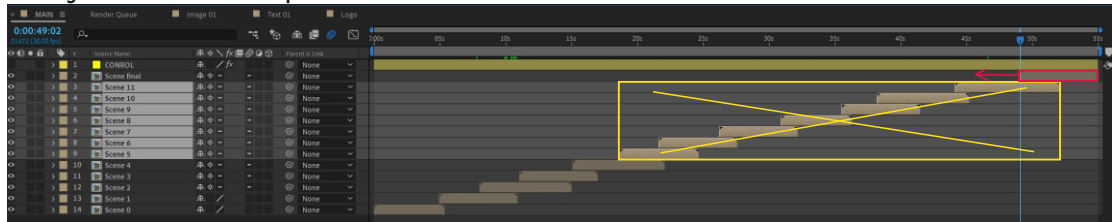

Opener customization

To change colors in the whole project go to **MAIN** composition and select yellow **CONTROL** layer. Then go to **Effects Control panel** (F3) and just pick your colors by clicking on the color boxes.

Opener customization

If you want to get opener with fewer scenes in the **MAIN** comp select and delete unnecessary layers (for example scenes #5-11). Then select **Scene Final** and move it left as in the picture below. Add your music and press **CTRL+M** to render.

Remember to move the Work Area End so that the length matches and there is no black screen at the end of the video.
