

Simple Clean Logo Reveal

Guide

Summary info

This project contains 4 versions of 1 logo reveal with unlimited color variations

You can change any text, colors and logo

Music in the preview is not included to this project

Links of the music you can find on product page on [Videohive.net](https://www.videohive.net)

Customization of this Logo Reveal is very very simple.

Logo customization

First of all, open **Simple Clean Logo.aep** file.
You must have Adobe After Effects CC2014 installed.

In the left Project panel open **Title** comp and then double click on text layer. Just type your text. Then open **Logo** comp.
You may use logotype with alpha channel (transparency) or text.
PNG format for logo is OK. But it must be in good quality (2K is good)

Logo customization

To change colors go to **MAIN** composition. Select yellow **CONTROL** layer.

Then go to Effects Control panel (press F3). Here are colored boxes.

Just click on it and pick needed colors. Use checkboxes to enable or disable some effects.

In the MAIN composition click on the eye icon to hide/unhide needed logo reveal variation with different camera movements.
