

Multi Photo Logo

Guide

Customization

You can change text, images, colors and logo

Music, photos and videos in the preview are not included in this project

First of all, open **Multi Photo Logo.aep** file.

You must have Adobe After Effects CC installed.

To add your images/videos and change the text open **_EDIT** folder in the **Project Panel**.

Add your images to **image#** compositions. Edit text in **Title** composition. Add you logo to **Logo** composition.

In the **MAIN** composition select **CONTROL** layer and go to Effects Control (F3) to change background color and add or remove some effects.

Add your music, press Ctrl+M to render final product.
