

Metaverse Corporate Slideshow

Guide

Summary info

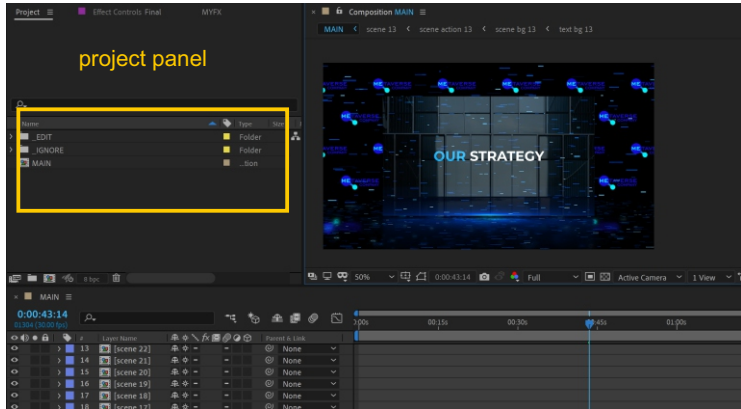

This project contains 36 different slides 60 sec long each
and 2 slides with logo.

This project uses Montserrat font
you can download it from [fonts.google.com](https://fonts.google.com/specimen/Montserrat)
<https://fonts.google.com/specimen/Montserrat>

You can change text, images, colors and logo
Music, photos and videos in the preview are not included in this project

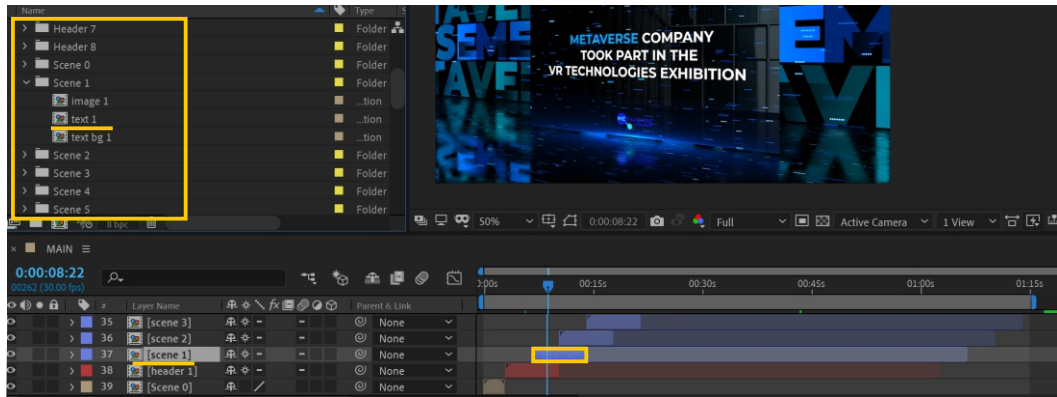

Opener customization

First of all, open [Metaverse Corporate Slides.aep](#) file.
You must have Adobe After Effects CC installed.
In the left [Project panel](#) find [MAIN](#) composition.

Opener customization

In the opened composition look at the layers in the bottom left corner. To add your images/videos and change the text open **_EDIT** folder in the **Project Panel**. Then find the folder with corresponding number in the name. For example **scene 1** folder for **scene 1** layer. It is easy.

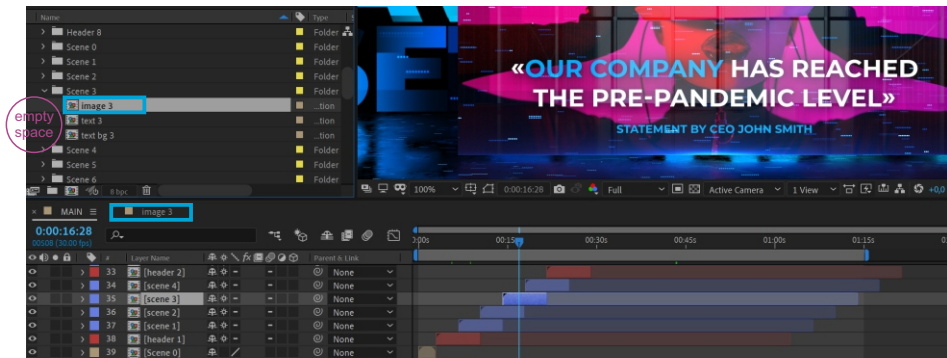

Opener customization

To add your video or photo open one of the 'image' compositions.

For example **scene 3 image 3**. Import your video/images and just drag and drop it to the opened composition.

To import media in AfterEffects just double click on the empty space in the Project Panel

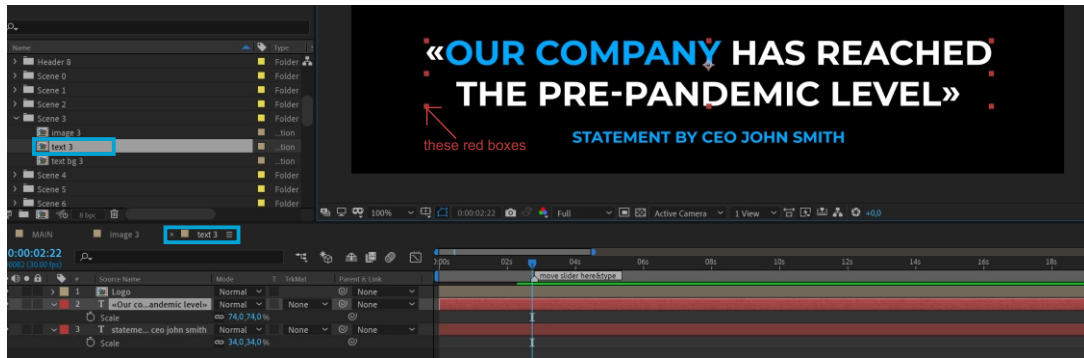

Opener customization

To change the text open one of the 'text' compositions.

For example **Scene 3 text 3**. Just select text layer and double click on it to type something.

*To change the size of the text use red colored boxes. Holding SHIFT click and drag your mouse.
If you want to add additional text layers select text layer and press CTRL+D*

Opener customization

To change colors in the whole project go to **MAIN** composition and select yellow **COLOR CONTROL** layer. Then go to **Effects Control panel** (F3) and just pick your colors by clicking on the color boxes.
